

Sideloaded Support By Device

We use the term *Sideloaded* to describe the process of loading an app from a source other than the app store typically used by the platform's store, such as the App Store for iOS or the Google Play Store.

This document provides support for sideloading apps using the ClassView platform. Apps include teacher and student apps for iLit, myPerspective ELD Companion, and Words Their Way. A summary of the sideloading process steps for IOS and Chrome are included.

- [Sideloaded on iOS](#)
- [Sideloaded on Chromebook](#)

Sideloading on iOS

In the following example, we will demonstrate the download of the iLit teacher app onto an iPad. The same process applies to both myPerspectives ELD Companion and Words Their Way.

Tap on the Safari icon and go to pearsonappstore.com

Select the app you wish to load: iLit, myPerspective ELD Companion, or Words Their Way

For this example, we've chosen iLit, but the process is the same for any of our apps. Tap the "Teacher" button under the Apple iPad icon to sideload the teacher app.

Tap “Install” when you receive the popup message.

Depending on your network speed, the app should take about 15 to 20 seconds to download.

Tap “Trust” on the popup.

Depending on settings on your device, you may have to go into Settings and “trust” apps from Pearson

Once trusted, the app will be ready to use.

Tap on the app icon and then begin the login process.

Repeat the process for the student app or any of the other apps on PearsonAppStore.com

Sideloading on Chromebook

In the following example, we will demonstrate the download of the iLit teacher app onto a Chromebook. The same process applies to both myPerspectives ELD Companion and Words Their Way.

Open the Chrome browser on your Chromebook

Go to PearsonAppStore.com

Select the app you wish to load: iLit, myPerspective ELD Companion, or Words Their Way

For this example, we've chosen iLit, but the process is the same for any of our apps. Select the Teacher or Student under the ChromeBook icon.

A message will pop up indicating that the app is being downloaded

Once the download is complete, a .crx file for the app will be placed in the folder under Downloads (blue folder in bottom tray)
 Select the triple dots in the upper right of the browser, select More Tools and then select Extensions.

An Extension tab will open as a browser tab. It will look similar to the image below.

After the Extensions page loads, select the blue Folder icon in the bottom tray. Select the TeachILit .crx file in the blue Folder and then drag and drop it to the Extensions page.

After dragging and dropping the file, a popup will appear verifying that you wish to add the app. Select *Add App*
